

## Scaletec Silage Software System

- Jobs, tare weights, truck ID's, customer ID's all entered on the database at the office and then downloaded to indicator
- Can add new jobs on site – site foreman can input additional jobs on site through the indicator keyboard, allowing the flexibility to adapt to unplanned events
- **Dry matter % entered through keyboard on site giving actual net weight and running total – no more manual calculation of the actual weight being processed. Can be entered for each job to allow for differences in moisture throughout the day**
- Download information & jobs to **USB** stick – do all the number crunching back at the office – reduces paperwork on site and therefore minimises errors through human input, lost/wet paperwork etc. – simply plug your USB stick into your PC/Laptop at the office
- Certified for trade use – keeps Trading Standards happy as the indicator is fully trade approved (weighbridge/platform needs to be trade approvable as well)
- Options
  - Transport case
  - Dallas tag reader system
  - Wi-Fi
- Can be installed on existing Weighbridge – upgrade your existing weighbridge without the need to replace the whole system
- We also certify any approved weighbridge system – not happy with your existing service provider? – We can provide the solution at a competitive cost with excellent service.
- Supply of weighbridges/axle weighers/scales – we know weighing and have designed our systems to meet the needs of Kiwi's.

07/02/2013 04:28PM SCALE #1		Scale #1
